

*Curriculum Vitae*  
**ALEXANDRE RASOULI**

**PERSONAL**

Born: June 26, 1976; London, England (US Citizen)  
Address: 12 Hidden Pass  
Newport Coast, CA 92657  
Email: rasoulimd@gmail.com  
Phone: 949-338-2658

**EDUCATION**

2007-2008 **University of Miami/Jackson Memorial Hospital**, Miami, FL  
**Frank J. Eismont, MD (Director)**  
Combined Neurosurgical/Orthopaedic Spinal Surgery Fellowship

**Miami Children's Hospital**, Miami, FL  
**Harry L. Shufflebarger, MD (Director)**  
Spinal Deformity Fellowship

2002-2007 **University of California**, Irvine, CA  
Orthopaedic Surgery Residency

1998-2002 **University of California**, Irvine, CA  
Doctor of Medicine

1994-1998 **Stanford University**, Stanford, CA  
Bachelor of Science with Honors

**Honors Thesis:** *A Novel Mechanism of T-Cell Subset Commitment:  
The B-cell Mediated Th2 Induction System*

**RESEARCH POSITIONS**

2003-PRESENT **Spinal Cord Injury Repair**, Peripheral Nerve Laboratory,  
University of California, Irvine College of Medicine  
Developed and implemented novel methods of spinal cord regeneration in rat  
contusion and hemisection models.

1998-2002 **Laser-Mediated Cartilage Reshaping**, Beckman Laser Institute,  
University of California, Irvine College of Medicine  
Pioneered chondrocyte viability assessment using flow cytometry.  
Developed and implemented novel cellular biology techniques.

## RESEARCH POSITIONS *(continued)*

- 1994-1998      **Lymphocyte Subset Commitment**, Dept. of Biology, Stanford University  
Sought basis for immune therapy of Multiple Sclerosis. Elucidated a cause of T-helper cell commitment to the Th2 subset. Investigated, through 3D computer modeling, the effect of allelic variance in MHC allotypes on MHC structure and function. Researcher since freshman year.
- 1996-1997      **Mitral Valve Annuloplasty**, Dept. of Surgery, Stanford University  
Investigated and compared efficacy of rigid and flexible annuloplasty rings for repair of mitral valve regurgitation. Assisted with implantation surgeries and with follow-up studies of valve integrity after ring installation.
- 1993-1994      **HIV Mutation**, Dept. of Genetics, University of California, Irvine  
Investigated the mutation rates of Human Immunodeficiency Virus (HIV) in effort to determine feasibility of conventional vaccination. Worked in laboratory of Dr. Walter Fitch, Chairman, Dept. of Genetics. Compared intra- and interpatient virus mutation rates from infected patients in San Francisco; Miami; Edinburgh, Scotland; and Zaire.

## PUBLICATIONS

1.      **Rasouli, A.**, Kim, C., Basu, R., Wong, B.J.F. Use of flow cytometry to assess chondrocyte viability after laser-reshaping of porcine cartilage. *Proceedings SPIE*, 3907: 328-338, 2000.
2.      **Rasouli, A.**, Burden, M., Johansen, E., Wong, B.J.F., Basu, R. Correlation of Tissue Viability with Laser Parameters and Shape Change in Porcine and Lagomorph Cartilage. In submission to *Proceedings SPIE*.

## **BOOK CHAPTERS**

- Rasouli, A.**, Gupta, R.: Elbow, Wrist & Hand Injuries. In McMahon, P. (ed.): *Current Diagnosis & Treatment in Sports Medicine*. Philadelphia: LANGE Medical Publications/McGraw-Hill, 2006

## BOOK CHAPTERS *(continued)*

**Rasouli, A.**, Lammertse, D., Wang, M.: Acute Treatment Strategies for Spinal Cord Injury. In Lin, V. (ed.): *Spinal Cord Medicine: Principles and Practice*. New York: Demos Medical Publishing, in press

## ORAL PRESENTATIONS

1. “The Parameter Correlation Matrix: Uniting Physical and Biological Factors in the Laser-Mediated Reshaping of Cartilage.” American Society for Lasers in Medicine and Surgery. **Invited Speaker**, Twenty-First Annual Conference, April 2001, New Orleans, LA
2. “Laser Reshaping: Laser Parameters, Reshaping Efficacy, and Tissue Viability in Lagomorph Cartilage.” Lasers in Otolaryngology, BIOS 2001 International Symposium, Society of Optical Engineering, January 2001, San Jose, CA
3. “A Novel Application of Flow Cytometry: Ultra-Rapid Determination of Viability in Laser-Reshaped Porcine Cartilage.” American Society for Lasers in Medicine and Surgery. **Invited Speaker**, Twentieth Annual Conference, April 2000, Reno, NV
4. “Using FACS to Assess Cell Death in Laser-Reshaped Cartilage.” Surgical Forum of the American Federation for Medical Research, Twenty Eighth Annual Western Meeting, February 2000, Carmel, CA
5. “Fluorescence-Activated Cell Sorting: Solving the Viability Question in Laser-Reshaped Cartilage.” Annual Dean's Summer Research Symposium at the University of California, Irvine College of Medicine, May 2000, Irvine, CA
6. “Flow Cytometric Analysis of Viability in Laser-Irradiated Porcine Cartilage.” Lasers in Otolaryngology, BIOS 2001 International Symposium, Society of Optical Engineering, January 2000, San Jose, CA
7. “Novel Transplantation of Preconditioned Schwann Cells Following Adult Spinal Cord Contusion Injury.” Scoliosis Research Society. **Invited Speaker**, 2005 SRS Annual Meeting, September 2005, Miami, FL
8. “Transplantation of Preconditioned Schwann Cells Following Adult Spinal Cord Contusion Injury: Novel Approach to Treatment” Cervical Spine Research Society. **Invited Speaker**, 2005 CSRS Annual Meeting, December 2005, San Diego, CA

## AWARDS & RECOGNITIONS

- 2007 University of California, Irvine Department of Orthopaedic Surgery **Senior Resident Research Award**, given to the resident with the best academic research achievement
- 2005 **Russell Hibbs Award Finalist**, Basic Science, Scoliosis Research Society
- 2005 **Resident Fellow Research Award Finalist**, Cervical Spine Research Society
- 2001 Nominated to Sigma Xi Honors Research Society
- 2000 Winner of the **Whitaker Foundation for Biomedical Engineering** Research Grant
- 2000 Dean's Recognition for scoring in the 99 Percentile on the NBME Physiology Exam
- 1999 Winner of the **National Institutes of Health** Summer Research Fellowship
- 1999 Dean's Award for Academic Excellence for medical students in **top 10% of class**
- 1999 Recognition by American Federation for Medical Research for excellence in research
- 1994 Foothill High School graduating class **Valedictorian**
- 1994 8-semester member California Scholarship Federation
- 1993 **Robert C. Byrd Honors** scholar

## LEADERSHIP, COMMUNITY, AND TEACHING EXPERIENCE

- 1998-2000 **Director, Medical Scholars Program**, University of California, Irvine College of Medicine. Director of program that fosters peer-led approaches to medical training, through such programs as Panel Discussions and ExamBase, a peer-run study-aid service.
- 1999-2000 **Director, Biochemistry Tutoring Program**, University of California, Irvine College of Medicine. Responsible for organizing tutoring sessions for first-year student physicians.
- 1997-1998 **Course Assistant, Biology Core Laboratory Courses**, Stanford University Responsibilities included teaching of weekly Molecular Biology sections, planning and improvement of courses, and student advising.
- 1994-1998 **Volunteer, USVH, Menlo Park VA Hospital**, Menlo Park, CA Worked since freshman year of college as volunteer at Menlo Park VA Hospital. Provided clinical services and social support for Alzheimer's and geriatric patients.
